

Goodoo AI Development Roadmap

Updated 3-Sprint Strategy for Complete Multimodal MVP Development

🕒 3 Months Timeline

🎤 Real-time Audio Transcription

👁️ Visual Content Intelligence

🧠 AI-Powered Analysis

Executive Summary

🚀 Multimodal Meeting Intelligence Platform

Goodoo AI revolutionizes meeting documentation by capturing and understanding BOTH audio conversations AND visual content (screen shares, presentations, documents) in real-time. This comprehensive approach creates complete meeting intelligence that goes far beyond traditional transcription.

Sprint 1: Foundation

Multimodal transcription with bot auto-joining

Sprint 2: Intelligence

Project page with AI chat and visual artifacts

Sprint 3: Polish

NotebookLM UI + Stripe + enhanced sharing

Sprint 1: Multimodal Foundation

Month 1 - Core multimodal transcription and recording capabilities

🎯 Core Deliverables

- 🔴 **Multimodal Real-time Transcription**
Audio + Visual content processing using Gemini APIs
- 🔴 **Enhanced Chrome Extension**
Google Meet integration with dual capture (audio + screen)
- 🔴 **Bot Auto-joining**
Scheduled and unscheduled meetings with permission handling
- 🔴 **Synchronized Recording**
Continuous audio + visual capture with timestamp sync
- 🔴 **Enhanced Transcript Page**
Timeline with visual thumbnails and context markers

⚙️ Technical Requirements

Chrome Extension Enhancement

- Google Meet API integration
- WebRTC audio + getDisplayMedia() screen capture
- Background script dual processing
- Meeting detection with visual activity monitoring

Backend System

- Parallel audio + visual processing pipelines
- Gemini Speech + Vision API integration
- Real-time content synchronization
- Frame extraction and analysis

Database Requirements

- Enhanced session management
- Multimodal content storage
- Visual content metadata and references
- Synchronized timeline data

Key Innovation: Visual content processing creates competitive differentiation - capturing presentations, documents, and screen demonstrations alongside conversation context.

🧠 Sprint 2: Multimodal Intelligence

Month 2 - Smart organization and AI-powered multimodal features

🎯 Core Deliverables

- 🔴 **Enhanced Project Workspace**
Dual panels with visual content integration
- 🔴 **Multimodal AI Chat**
Context-aware conversations using audio + visual data
- 🔴 **Visual Resource Panel**
Screen captures, presentations, and document thumbnails
- 🔴 **Enhanced Artifact Creation**
Summaries incorporating visual context and decisions
- 🔴 **Cross-Modal Search**
Find content across audio, visual, and uploaded materials

🧠 AI Intelligence Features

Contextual Multimodal Chat

- Visual-audio context correlation
- "What was shown when X was discussed?"
- Screen content + conversation synthesis
- Smart content suggestions

Enhanced Artifact Generation

- Meeting summaries with visual context
- Action items linked to specific screens
- Decision tracking with supporting visuals
- Key slide/document extraction

Visual Content Intelligence

- Presentation structure recognition
- Document content extraction
- Chart and diagram analysis
- Screen configuration capture

🏠 Enhanced Project Workspace Layout

Left Panel: Multimodal Resources

- Meeting transcriptions with visual markers
- Screen capture thumbnails
- Uploaded documents with AI insights
- Presentation slides extraction
- External links with preview
- Generated visual artifacts

Right Panel: Intelligent Chat

- Multimodal contextual conversation
- Visual-audio correlation queries
- Artifact creation commands
- Cross-modal insights
- Smart suggestions based on content
- Timeline-based Q&A

💎 Sprint 3: Professional Polish & Monetization

Month 3 - Production-ready interface and premium features

🎨 Complete UI/UX

- NotebookLM-inspired design
- Multimodal content visualization
- Responsive timeline interface
- Visual content gallery
- Professional meeting summaries

💰 Premium Features

- Stripe subscription management
- Tiered pricing for visual processing
- Advanced AI insights
- Team collaboration tools
- Enterprise security features

🔗 Enhanced Sharing

- Deep-links to visual timestamps
- Shareable meeting highlights
- Cross-project visual references
- Collaborative annotations
- Export with visual attachments

🔧 Production Requirements

Security & Privacy

Enhanced permissions for screen capture, encrypted visual content storage, GDPR compliance

Performance Optimization

Efficient visual processing, compressed storage, fast retrieval systems

Scalability

Cloud infrastructure for multimodal processing, CDN for visual content delivery

📊 Success Metrics

Technical KPIs

95%+ audio accuracy, 90%+ visual content recognition, <2s sync latency

Business KPIs

3-5x premium pricing adoption, 80%+ enterprise trial conversion

User Experience

Seamless multimodal workflow, intuitive visual navigation

🔧 Enhanced Technical Stack

Frontend

- React/Next.js framework
- Tailwind CSS styling
- WebRTC + Screen Capture APIs
- Real-time UI updates
- Responsive design

Backend

- Node.js/Python APIs
- WebSocket real-time comms
- Parallel processing pipelines
- Queue management
- Auto-scaling infrastructure

AI & Processing

- Gemini Speech API
- Gemini Vision API
- Content synchronization
- OCR processing
- Context correlation

Storage & Integrations

- PostgreSQL/MongoDB
- Cloud storage (GCS/S3)
- Google Meet API
- Stripe payments
- CDN delivery

📅 Development Timeline Overview

- Month 1: Multimodal Foundation**
Real-time audio + visual transcription, enhanced Chrome extension, synchronized capture
 - Core Features
 - API Integration
 - Dual Capture
- Month 2: Multimodal Intelligence**
Project workspace, visual-audio AI chat, enhanced artifact generation
 - AI Features
 - Visual Context
 - Project Management
- Month 3: Professional Polish**
Complete UI, payment system, enhanced sharing, production deployment
 - UI/UX
 - Monetization
 - Production

🏆 Multimodal Competitive Advantage

🎯 Market Differentiation

- ✅ **Beyond Audio:** Capture presentations, documents, and screen demonstrations
- ✅ **Complete Context:** Understand what was shown AND what was discussed
- ✅ **Premium Positioning:** 3-5x higher pricing than audio-only solutions
- ✅ **Enterprise Appeal:** Complete meeting intelligence for consultants

🌟 Strategic Benefits

- ★ **Barrier to Entry:** Complex multimodal processing creates 12-18 month moat
- ★ **Network Effects:** Richer data improves AI performance over time
- ★ **Consulting Focus:** Perfect fit for Odoo implementation meetings
- ★ **Scalable Innovation:** Foundation for future AI capabilities
